## One Trusted Partner

MegaplanIT is a security and compliance firm specializing in over 35 high-level services designed to protect cardholder and other sensitive data. Working alongside your team, we help identify opportunity areas to enhance security for your networks, systems, and website applications.

Our expert security consultants and QSAs are fully certified and have decades of experience helping businesses like yours stay safe from cyber threats. We build long-term relationships with our customers and provide holistic services to meet all your security and compliance needs.

# A Simplified Compliance Experience

MegaplanIT has a deep understanding of the challenges that organizations face in achieving and maintaining compliance over time. Organizations need the support of a partner who is focused on the overall success of their compliance and cyber security efforts.

Securing your organization against cyber threats and maintaining compliance can be expensive and confusing. MegaplanIT provides comprehensive IT security and compliance services tailored to the specific needs of your business, with easy to understand pricing and no hidden costs.

We view every engagement as the beginning of a long-term partnership. Our experienced team of PCI DSS QSAs, penetration testers, and security consultants will get to know your business and guide you down the most effective path to secure your business.

MegaplanIT provides a comprehensive range of services that meet all your security and compliance needs. Our experts have decades of experience helping businesses like yours achieve their security and compliance goals, and we are constantly expanding our services and certifications to ensure you won't need to shop around.

## When You Employ MegaplanIT

### We Cover Your Goals

No need to look elsewhere. We pride ourselves on our holistic services, which are designed to meet all our customers' security and compliance needs.

### We Hire The Best

All our consultants are fully certified and highly experienced.

### We're Flexible

We adapt our assessment approach to your organization's specific security needs.

MegaplanIT takes pride in maintaining long lasting client relationships. Many of our clients have entrusted us to provide them with security services year after year. This is accomplished by going above and beyond the client's expectations and partnering with the client to meet their security and compliance objectives.

# PCI Assessment Services

MegaplanIT understands that compliance objectives change over time. IT security controls become more stringent and evolve to address new threats. We provide expert guidance to our clients so they can effectively address these changes and can strategize for future IT security needs that will save you time and money.

## PCI DSS Assessment

Our PCI DSS assessment services are designed to keep your costs and level of effort down while making it easy to stay compliant year after year.

## PA-DSS & SSF Assessment

Entities benefit from the use of certified PA-DSS apps by reducing the scope of their own PCI assessment and mitigating the risk associated with developing a payment application.

## PCI DSS SAQ Assistance

MegaplanIT's PCI DSS SAQ Advisory self-service portal is a fully-branded, custom application gateway for organizations that require SAQ reports.

## PCI-Gap Analysis

This review covers all 12 PCI DSS Requirements. This provides a picture of your existing strengths and weaknesses and can help reduce the scope and cost of your final PCI DSS Assessment.

## P2P Solution Validation

We guide you through every step of your P2PE assessment, including audit preparation, on-site assessment of data flows and processes, policy and procedure development, and secure key management.

## PCI 3DS Assessment

3DS helps businesses authenticate high-risk transactions with confidence and shift liability for fraudulent payments back on card issuers. Applies to entities that perform or provide: (3DSS, DS, ACS).

## Included In Your PCI Compliance Services

MegaplanIT offers trusted advisory, gap remediation, and policy & procedure assistance. We provide the tools and expertise necessary to achieve compliance. MegaplanIT never sells the client a service or solution that will not fulfill the security goals of the client.

**PCI DSS Gap Assessment**

**Trusted Advisory & Remediation Assistance**

**Policy & Procedure Assistance**

**Compliance Project Management**

**Quarterly Network Device Audit**

**ASV Scanning - Up To 12 IP's Included**

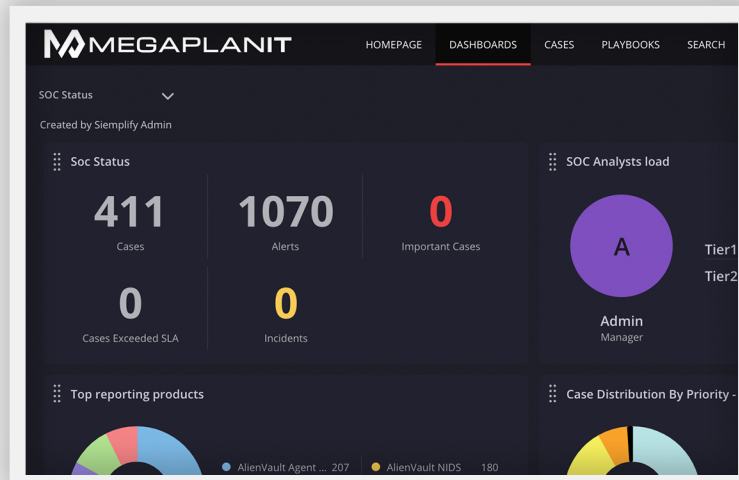

24/7/365 Always On Protection

# Managed Security Services

MegaplanIT deploys monitoring technology based on what is the best fit for our clients. We are vendor agnostic and only partner with vendors providing superior technologies. We perform periodic evaluations of the industry leading technologies to ensure they are always staying up to date with threats and advancing as the threat landscape evolves.

## Security Orchestration, Automation & Response (SOAR)

With automated alert contextualization provided via a combination of proprietary and open-source intelligence feeds, MegaplanIT's security team can rapidly triage and drill-down on suspicious activity to identify malicious actors in your environment.

## Custom Platform Integration For Your Unique Needs

Through additional SOAR integrations, our security team can also incorporate many of your existing security solutions into our response capabilities and we custom tailor every incident response plan based on your organization's unique business needs and processes.

## Response Time In Minutes, Not Days.

MegaplanIT's SOAR Capabilities can cut your current incident response time down from days to minutes! With 24/7/365 hands-on security management, you can improve your security infrastructure which will result in Maximizing your ROI.

# Security Penetration Testing

The vast majority of security breaches are made possible by unidentified vulnerabilities and configuration errors in an organization's network or applications. Our fully certified security testing services are **Designed** to help you **Find & Fix** weaknesses in your networks and applications which can lead to costly damage!

## Secure Your Network & Comply With Regulations

Our experts provide a comprehensive suite of security testing services designed to help you uncover and remediate weaknesses in your organization's security architecture.

### Network Penetration Testing

We provide penetration testing of internal and external networks to help you identify vulnerabilities and ensure you are PCI DSS compliant all year round.

### Web Application Penetration Testing

Designed to evaluate the security of any browser or network-based application by simulating attacks from malicious sources like malware, spyware, and cyber criminals.

### Mobile Penetration Testing

Our mobile application security assessment will uncover vulnerabilities in your mobile application software, code, and related security controls to ensure your mobile apps are adequately protected from the ground up.

### Social Engineering Penetration Testing

To prepare your users for social threats, proper training is essential. Our social engineering assessment provides a baseline for companies who want to understand their current state of readiness and vulnerabilities.

## ADDITIONAL CAPABILITIES

### Vulnerability Scanning

Identify possible entry points and vulnerable systems that might otherwise be missed.

### Approved Scanning Vendor

Regular vulnerability scans from an ASV is a core component of PCI DSS compliance.

### Secure Code Review

Analyze your website and application code for weaknesses that could be exploited by malicious actors.

### Cloud Security Architecture

A cost-effective way to determine your organization's current level of cloud security risk, and identify areas for improvement.
