WORLD-CLASS SECURITY FOR YOUR ORGANIZATION'S CRITICAL ASSETS

As digital threats become increasingly common and sophisticated, many organizations are turning to managed security service providers to monitor and secure their digital assets and data. MegaplanIT's 24/7/365 Security Operations Center provides a comprehensive suite of managed services to protect your business against the latest cyber attacks.

Our team provides always-on monitoring, incident response advisory, and support services to protect your digital assets—whether your network is hosted on-premise, in the cloud, or in a hybrid environment. In addition to monitoring techniques, our experts use active threat intelligence, intrusion detection, and cutting-edge security technologies to identify genuine threats and work with your security team to remediate them.

What We Offer

MANAGED SECURITY SERVICES

Why Work with MegaplanIT?

- Based out of our cutting-edge Security Operations Center in Scottsdale, Arizona, our managed security services team ensures your business network and assets are protected at all times.
- Unlike many security service providers, we build long-term relationships with our clients. That means we get to know your business inside out, and can tailor our services accordingly.
- We pride ourselves on providing a holistic range of services for all our clients' security and compliance needs—and we constantly expand our services and certifications to make sure it stays that way.

Additional Services

-  Endpoint Detection and Response
-  Vulnerability Lifecycle Management
-  Network Intrusion Detection

MegaplanIT's Managed Security Services team also works hand in hand with our Compliance Services team to provide extra value and insight for meeting and maintaining compliance standards.

SECURITY OPERATIONS CENTER AS A SERVICE (SOCaaS)

The Definitive Guide To
SOC as a Service

Download Whitepaper

SOCaaS is a managed security monitoring service that encompasses a variety of traditional SOC functions, including **log management, intrusion detection, file integrity monitoring, and security incident investigation.**

Based out of our state-of-the-art security operations center in Scottsdale, Arizona, our SOCaaS service is one part of a wider service offering that can meet the specific security and compliance needs of your organization. Our SOCaaS model allows you to integrate our SOC services just as you would any other subscription service. Our agents are light-weight and easily mass deployed across your environments, whether you currently operate on-premise, in AWS, Azure, or GCP. Any individual agent can be configured to serve as a syslog collector and also provides the ability to pull in cloud service logs via API connectors.

Key Benefits

- ✓ Reduce Your Cyber Risk
- ✓ World Class Response & Recovery
